

Property Dealer CRM System

Course: CS-4032 Web Programming

Assignment: 03

Student Name: Humayun Bilal

Roll No: 23i-0832

Section: D

1. Project Overview

The Property Dealer CRM system is a full-stack web application designed to help property dealers manage leads efficiently. The system centralizes leads received from multiple sources (Facebook Ads, Walk-ins, Website inquiries) and provides tools to assign leads, track progress, score priority, and analyze performance.

2. Technologies Used

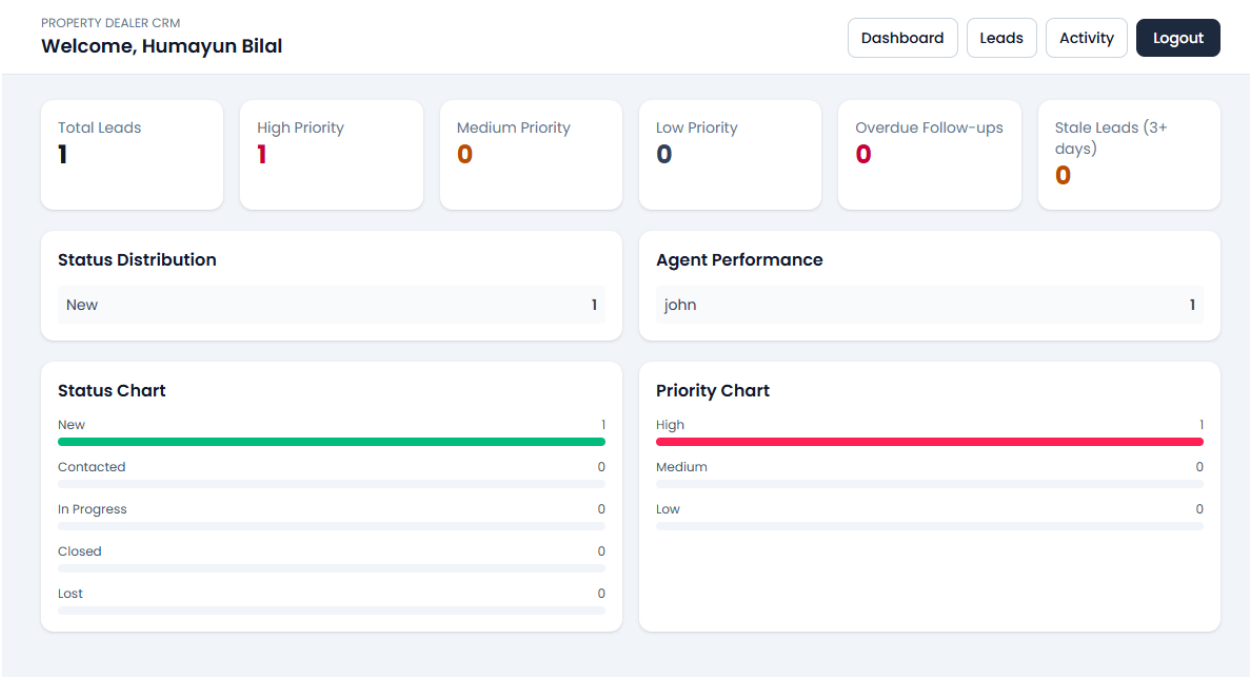

- **Frontend:** Next.js (App Router), Tailwind CSS
- **Backend:** Next.js API Routes, MongoDB + Mongoose
- **Auth:** JWT (cookie-based) + RBAC
- **Real-time:** Polling (fallback)
- **Email:** Nodemailer
- **Other:** Zod validation, PDF/CSV export

3. Core Features Implemented

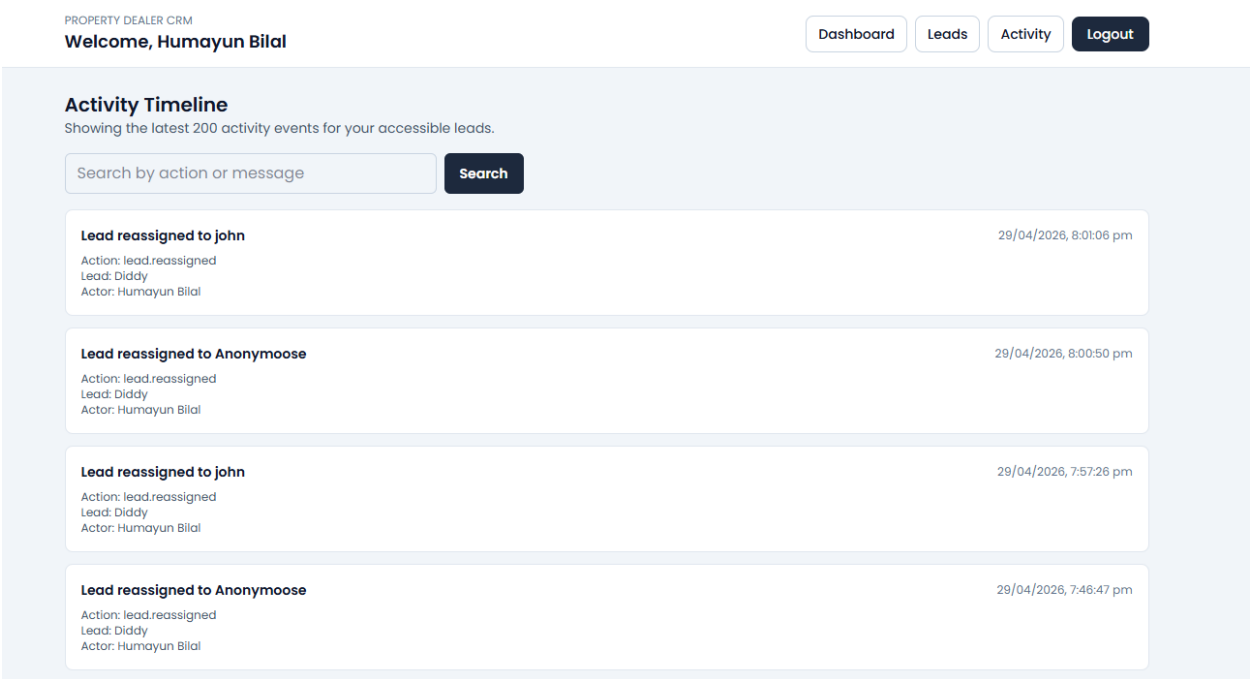

- Authentication (Signup/Login/Logout)
- Role-Based Access (Admin / Agent)
- Lead CRUD + Scoring
- Assignment + Reassignment
- Activity Timeline (Audit Log)
- Smart Follow-up Tracking
- Analytics Dashboard
- Export Leads (CSV/PDF)
- AI-style Follow-up Suggestions
